Summary Information

Repository	EBL Manuscripts Collection
Creator	Goldberger, Joseph, 1874-1929
Title	Joseph Goldberger Papers
Date [inclusive]	1899 - 1940
Extent	17.0 Cubic feet
Abstract	Personal papers of epidemiologist and infectious disease specialist Joseph Goldberger, Materials include correspondence, notebooks, manuscripts, reports and reprints. Correspondents include: C.H. Lavinder, Fayette Dunlap, Carl Voegtlin, William P. Jacobs, W.F. Tanner, G.A. Wheeler, Mary Farrar Goldberger, Seale Harris, W.H. Sebrell, Tom D. Spies, William De Kleine, O.S. Rask, H. Jackson Davis. This collection pertains primarily to Goldberger's studies of pellagra.

Preferred Citation

Joseph Goldberger Papers. Eskin Biomedical Library Special Collections, Vanderbilt University Medical Center, Nashville, TN.

Historical or Biographical Note

Joseph Goldberger (1874-1929) was an epidemiologist and infectious disease specialist. He is best known for his investigations that established pellagra as a deficiency disease. He performed research in preventive medicine and infectious diseases with original investigations of yellow fever (1902-1905), typhoid fever (1906), dengue fever (1907), trematodes [parasitic worms] (1907-1909), typhus fever (1909-1912), diphtheria (1913-1914) and pellagra (1914-1929).

He received his M.D. from Bellevue Medical College in 1895. He joined the Public Health Service Corps in 1899 and worked in the Hygienic Laboratories until 1929.

For more information about Dr. Joseph Goldberger please see the NIH's Exhibit on Dr. Goldberger and the War on Pellagra.

Collection Description

Personal papers of epidemiologist and infectious disease specialist Joseph Goldberger, Materials include correspondence, notebooks, manuscripts, reports and reprints. Correspondents include: C.H. Lavinder, Fayette Dunlap, Carl Voegtlin, William P. Jacobs, W.F. Tanner, G.A. Wheeler, Mary Farrar Goldberger, Seale Harris, W.H. Sebrell, Tom D. Spies, William De Kleine, O.S. Rask, H. Jackson Davis. This collection pertains primarily to Goldberger's studies of pellagra. Collection also contains materials related to vitamins and other nutritional subjects.
